

PEYTON MALVEAUX

San Antonio / Dallas, TX, USA | 469-500-0790 | thepeytonm@gmail.com | <https://peytonmalveaux.com> | U.S. Citizen | Open to Relocation

EDUCATION B.S. Computer Science | The University of Texas at San Antonio | May 2025

TECHNICAL SKILLS

- **Cloud & DevOps:** Microsoft Azure, Azure Arc, Entra ID (Azure AD), Power Automate, Logic Apps, Docker, Kubernetes, Rundeck, n8n, CI/CD, Infrastructure as Code (IaC)
- **Automation & Scripting:** Python, PowerShell, Git, REST APIs, JSON, SharePoint Automation, Gitea, Workflow Orchestration
- **Networking & Infrastructure:** Cisco IOS (Catalyst 9300, 3750, 4331), Meraki (MS, MX, MR), Arista (EOS), VLANs, Trunking, VPNs, NAT, TACACS+, RADIUS, Wireshark, Palo Alto Firewalls, OSPF, EIGRP, BGP, SNMP, SD-WAN, Zabbix, Prometheus
- **Databases:** PostgreSQL, Supabase, ClickHouse, SQL
- **Security & Compliance:** IAM, RBAC, MFA, SIEM/SOAR, PKI, Key Vault, Zero Trust, TLS, HIPAA, ISO 27001, Vulnerability Management
- **Operating Systems:** Linux, Windows Server
- **Tooling:** Grafana, Monday.com, Visual Studio, VS Code, Jira, Microsoft Dynamics, CRM/ERP Systems
- **Languages:** Python, PowerShell, C, C++, Java, HTML

PROFESSIONAL EXPERIENCE

Network Engineering Intern | Whataburger Corporate HQ - San Antonio, TX | Jan 2025 - Present

- Developed and deployed an end-to-end SD-WAN network automation solution using Python, Power Automate, and REST APIs (Meraki, Verizon, T-Mobile, IPAM, Monday, Rundeck) to provision networks for new units, significantly enhancing deployment efficiency.
- Engineered a comprehensive automation solution for enterprise switch upgrades, leveraging Python scripts, Zabbix API, and custom API calls to track, monitor, and report the replacement of legacy Cisco SG switches with Meraki MS series devices across hundreds of sites.
- Designed and implemented an automated provisioning flow utilizing the Meraki Dashboard API to deploy new Meraki switches, reducing manual onboarding time and minimizing configuration errors.
- Configured and replaced Cisco Catalyst 9300 and legacy 3750 switches, including firmware updates, SSH hardening, and VLAN segmentation to enhance network security and performance.
- Implemented OSPF and EIGRP routing protocols and configured port channels in a 3-site lab simulation, preparing for core device integration and network scalability.
- Automated network inventory updates using Zabbix and Prometheus Python API calls, storing information in Gitea.
- Designed and implemented a PostgreSQL database in Supabase for centralized network inventory, integrating with n8n for automated updates and comprehensive querying.
- Developed n8n workflows for automated inventory updates, integrating with Microsoft Teams notifications, CRMs (Monday.com, Dynamics), and Zabbix for comprehensive monitoring.
- Provided daily technical support, troubleshooting complex network connectivity, switch replacement, and VLAN issues in real-time.

Cloud Services Intern | Whataburger Corporate HQ - San Antonio, TX | Jul 2024 - Dec 2024

- Automated provisioning of over 4,500 Azure and on-prem accounts weekly using Workday and Logic Apps, reducing service desk volume
- Designed and implemented incident response workflows and audit pipelines with Azure Monitor and Logic Apps, boosting security response effectiveness.
- Enforced robust RBAC policies and Azure Key Vault access controls to ensure ISO 27001 compliance.
- Deployed Azure Arc for Hybrid Worker configuration, enabling cross-platform job automation.
- Contributed to SIEM/SOAR configuration, developing custom alerts for login anomalies and lateral movement detection.

DevSecOps Intern | The Commons XR - Remote | Jan 2024 - Jul 2024

- Designed and implemented secure Single Sign-On (SSO) and Multi-Factor Authentication (MFA) flows for Azure environments.
- Developed and deployed granular Identity and Access Management (IAM) policies, coupled with automated access audits.
- Conducted comprehensive security assessments aligned with HIPAA and GDPR regulations.
- Built Logic Apps to continuously monitor and report unauthorized database schema changes.

Security Analyst Intern | Magavi Enterprises - San Antonio, TX | Jan 2023 - May 2023

- Performed detailed security audits and gap assessments, leading to an 85% improvement in endpoint protection.
- Provided technical recommendations for encryption practices and PKI implementation.
