Education

The University of Texas San Antonio - B.S Computer Science

San Antonio, TX, USA

August 2021 – May 2025

Experience

Whataburger Corporate

San Antonio, TX

NETWORK ENGINEER INTERN

January 2025 – Present

- Developed an Automation pipeline that transforms hardware checklists into structured JSON, syncs with Gitea, and integrates with Rundeck to configure new network deployments via Power Automate and Python as well as Meraki, Verizon, T-Mobile, IPAM, and Monday APIs.
- Network Security & Troubleshooting: Investigated unauthorized devices using TACACS, Radius, and Wireshark, resolving VPN tunneling issues and 900,000+ stuck network flows that overloaded CPUs.
- Infrastructure Upgrades & Automation: Configured and replaced Cisco 9300 & legacy 3750 switches, securing SSH & management plane, updating firmware, and ensuring modern security standards.
- Optimized Meraki switch replacements with structured documentation, color-coded port labeling, and automated reporting via Power Automate & SharePoint.
- Cross-Team Collaboration: Assisted in troubleshooting restaurant network connectivity, analyzing packet captures, and refining VLAN configurations to resolve persistent issues.

Whataburger Corporate

San Antonio, TX

CLOUD SERVICES ENGINEER INTERN

July 2024 – December 2024

- Identity & Access Management (IAM): Automated 4,500+ account provisions weekly for Azure & on-prem environments via Workday & Logic Apps, reducing IT tickets by 25%.
- Cloud Security & Automation: Developed incident response playbooks & auditing tools with Azure Monitor & Logic Apps, improving security response by 90%.
- RBAC & Compliance: Implemented role-based access control (RBAC) policies and Azure Key Vault security enhancements, ensuring ISO 27001 compliance and restricting unauthorized access.
- Hybrid Cloud Infrastructure: Deployed Azure Arc servers for secure Hybrid Worker automation jobs, optimizing cloud-to-on-prem synchronization.
- Security Monitoring: Assisted in SIEM/SOAR integrations, setting up automated alerts for suspicious login attempts and network anomalies.

The Commons XR

REMOTE, USA

SECOPS INTERN

JANUARY 2024 – JULY 2024

- Designed SSO & MFA authentication flows, strengthening cloud security & compliance.
- Implemented granular IAM policies across Azure environments, improving access control.
- Conducted security assessments to align with HIPAA & GDPR compliance requirements.
- Created Logic Apps to audit database schema changes

Magavi Enterprises

San Antonio, TX

SECURITY ANALYST INTERN

January 2023 – May 2023

- Conducted security and compliance audits, improving security postures by 85% using best practices.

Skills

Networking & Security: Cisco (Switching & Routing), Meraki, VLANs & Trunking, VPN, Wireshark, TACACS/RADIUS, Firewalls

Cloud & Automation: Microsoft Azure, Entra ID, Hybrid AD Sync, Azure VPN Gateways, PowerShell & Python Automation, Sharepoint

Cybersecurity & Compliance: Zero Trust Security, IAM, MFA, PKI, Security Auditing, Encryption (RSA, XOR), TLS, Risk Analysis, I

Tools & Platforms: Docker, Kubernetes, SIEM/SOAR, Rundeck, Logic Apps, Grafana, IPAM, TACACS, Monday, GitEA, Git, Power Automate

Programming Languages: Python, Powershell, C, C++, Java, HTML, JSON

Projects

HADOOP CLUSTER ON CHAMELEON CLOUD

DEPLOYED A HADOOP CLUSTER ON CHAMELEON CLOUD, USING MAPREDUCE TO PROCESS LARGE DATASETS - CONFIGURED MULTI-NODE VMS WITH OPTIMIZED HDFS REPLICATION AND IMPLEMENTED PYTHON-BASED MAPPER <https://peytonmalveaux.com/hadoop.html> AND REDUCER PROGRAMS FOR EFFICIENT DATA ANALYSIS

PKI LAB IMPLEMENTATION

- CONFIGURED A ROOT CERTIFICATE AUTHORITY (CA) TO ISSUE X.509 CERTIFICATES AND SECURED A WEB SERVER USING HTTPS/TLS. - DEPLOYED AND TESTED SELF-SIGNED CERTIFICATES AND EVALUATED BROWSER TRUST <https://peytonmalveaux.com/pki.html> CONFIGURATIONS. - SIMULATED AND MITIGATED MAN-IN-THE-MIDDLE (MITM) ATTACKS TO DEMONSTRATE THE ROLE OF PKI

CUDA PARALLEL PROGRAMMING AND EFFICIENCY ANALYSIS

- DEVELOPED PARALLEL SORTING ALGORITHMS USING CUDA, INCLUDING COMPARE AND EXCHANGE AND BITONIC MERGE AND SPLIT TECHNIQUES. - ACHIEVED 3X SPEED IMPROVEMENTS BY TRANSACTION MEMORY AND OPERATIONS <https://peytonmalveaux.com/cuda.html> FROM GLOBAL TO SHARED MEMORY

Certifications (In Progress)

2025 CCNA,
2025 Security+,
