EDUCATION

B.S. Computer Science

The University of Texas at San Antonio — May 2025

TECHNICAL SKILLS

Infrastructure & Networking: Cisco IOS, Meraki, VLANs, Trunking, VPNs, NAT, TACACS, RADIUS, Wireshark, Firewalls

Cloud & DevOps: Microsoft Azure, Azure Arc, VPN Gateways, Entra ID, Hybrid AD, Power Automate, Logic Apps, Docker, Kubernetes, Rundeck

Automation & Scripting: Python, PowerShell, Git, REST APIs, JSON, SharePoint, CI/CD, Gitea

Security & Compliance: IAM, RBAC, MFA, SIEM/SOAR, PKI, Key Vault, Zero Trust, TLS, HIPAA, ISO 27001

Tooling: Grafana, IPAM, Monday.com, Visual Studio, VS Code

Languages: Python, PowerShell, C, C++, Java, HTML, x86 Assembly

PROFESSIONAL EXPERIENCE

Network Engineering Intern

Whataburger Corporate HQ – San Antonio, TX

Jan 2025 – Present

- ❑ Developed end-to-end SD-Wan network deployment automation using Python, Power Automate, and APIs (Meraki, Verizon, T-Mobile, IPAM, Monday, Rundeck) that builds the networks of new units.
- ❑ Scripted and automated the tracking, monitoring, and reporting of our enterprise switch upgrade project, replacing legacy Cisco SG switches with Meraki MS series devices across hundreds of sites.
- ❑ Built an automated provisioning flow that deployed new Meraki switches to their respective networks using the Meraki Dashboard API, reducing manual onboarding time and configuration errors.
- ❑ Replaced and configured Cisco 9300 and legacy 3750 switches, including firmware updates, SSH hardening, and VLAN segmentation.
- ❑ Standardized switch replacements with port labeling and SharePoint-integrated documentation to accelerate rollout.
- Provided daily phone-based support to onsite technicians, troubleshooting network connectivity, switch replacements, and VLAN issues in real time.

Cloud Services Intern

Whataburger Corporate HQ – San Antonio, TX

Jul 2024 – Dec 2024

- Automated provisioning of over 4,500 Azure and on-prem accounts per week using Workday and Logic Apps; reduced service desk volume by 25%.
- Designed incident response workflows and audit pipelines with Azure Monitor and Logic Apps to boost security response effectiveness.
- Implemented RBAC policies and Azure Key Vault access controls to meet ISO 27001 standards.
- Deployed Azure Arc for Hybrid Worker configuration, enabling cross-platform job automation.
- Supported SIEM/SOAR configuration with custom alerting for login anomalies and lateral movement detection.

DevSecOps Intern

The Commons XR – Remote

Jan 2024 – Jul 2024

- Designed secure SSO and MFA authentication flows for Azure environments.
- Implemented granular IAM policies and automated access audits.
- Conducted security assessments aligned with HIPAA and GDPR.
- Built Logic Apps to monitor and report unauthorized database schema changes.

Security Analyst Intern

Magavi Enterprises – San Antonio, TX

Jan 2023 – May 2023

- Performed security audits and gap assessments, improving endpoint protection by 85%.
 - Provided technical recommendations for encryption practices, PKI, and compliance procedures.
-

CERTIFICATIONS

In Progress

- Cisco Certified Network Associate (CCNA) – 2025
- CompTIA Security+ – 2025
